(57) **ABSTRACT**

A light bulb changer method and apparatus that contains components that allows for instantly detecting a burned out light, automatically removing the burned out light, and automatically replacing the burned out light with a replacement bulb. The changer operates without human intervention, and can be assembled from a kit having a light fixture, detecting sensor, removing and replacement hardware. The kit can allow a consumer to assemble the changer for use as a novelty item, and/or also to be used as a working light fixture, such as a table lamp, and the like. The changer can also be used as a retrofit for existing light fixtures so that the existing light fixtures can be modified.
